About

Aspiring Data & AI Engineer with strong foundations in Python, SQL, and Data Structures. Experienced in machine learning projects, data analysis, and building scalable applications.

Education

Amrita Vishwa Vidyapeetham

B.Tech in Electronics and Communication Engineering

CGPA: 7.52/10 (7 Semesters)

2022 – 2026

CS Academy

Higher Secondary Education

Class 12: 86.2% Class 10: 87.6%

2020 – 2022

Experience

Labmentix

May 2025

AI/ML Intern

- Built and optimized machine learning pipelines for data preprocessing and model training, improving workflow efficiency by 15%.
- Collaborated with cross-functional teams for prototype development and deployment.
- Managed version control and collaboration workflows using Git.

Technologies

Languages: Python, SQL, C/C++, Java, JavaScript

Frameworks & Libraries: HTML, CSS, React, PyTorch

Data Science: Pandas, NumPy, Matplotlib

Core Concepts: OOP, DSA, SDLC

Backend & APIs: REST APIs, Backend Development

Tools: Git, Tableau, Power BI, VS Code, Google Colab

Projects

Activity Recognition with LLM

Tools: Python, PyTorch, CNN, LLaMA

- Built a CNN-based human activity recognition system achieving 85%+ classification accuracy.
- Generated synthetic training data using LLaMA, increasing dataset size by 40% and improving F1-score by 12%.

Inventory Management System

Tools: Java, OOP

- Developed a Java-based inventory management system implementing OOP principles.
- Implemented CRUD operations with search, filtering and stock tracking.

Bitcoin Analysis Dashboard

Tools: Python, Pandas, SQL, HTML, CSS, JavaScript, APIs,

- Analyzed Bitcoin price data (2017–2025) by collecting, cleaning, and preprocessing large datasets using Python and Pandas.
- Built an interactive analytics dashboard with dynamic visualizations to highlight price trends and volatility patterns for data-driven insights.

Expense Tracker Application

Tools: Python, SQL, HTML, CSS

- Developed a full-stack expense tracking system with categorized logging and analytics.
- Integrated backend logic with a simple and responsive frontend.

Certifications

Introduction to Generative AI — Google

Supervised Machine Learning — Stanford University and DeepLearning.AI

Achievements

Hackathon: Finalist — ELCIA Sense2Scale Hackathon (Top 10 out of 200+ teams across India).

Speed Cubing: Competitive speed cuber– can solve a Rubik’s Cube in under 15 seconds.
